

Sara Lau
VMD 105

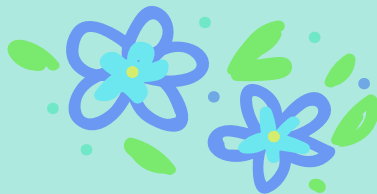

I took this class because I wanted to learn more about computer softwares that can be useful for art and design. My career goal is to become an animator or a graphic designer.

The typefaces I used for this project are Luna, Paper Daisy, and Times New Roman. I chose a pastel turquoise for the background and a darker version as a frame.

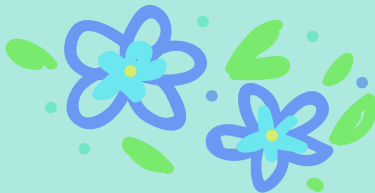

Why I took this class

The concept for my project was to create a literal interpretation of the phrase “it’s raining cats and dogs.” This project took a lot of work because I created multiple layers for each animal and erased the backgrounds of each image. I added a gradient to act as a filter to make the image look more dynamic.

Adobe Photoshop Final Project

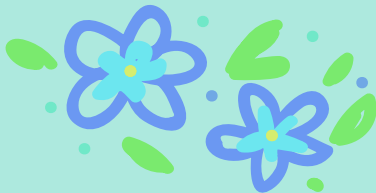

Raster Project

Originally, the idea for this project was to create a cute cat creature and its minions in an city full of flames, but there were no images that fit well with the cats. I ended up using a background where there was a board used to summon spirits.

Adobe Illustrator Final Project

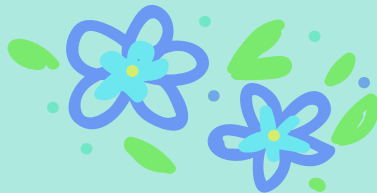

Vector Project

Out of all the programs I have used so far, Adobe Animate was the most time consuming, especially tweening everything and making sure it stays consistent. The idea for this project was for a hooded figure preparing to summon a demon, only to find the demon is a cute cat-like creature.

Adobe Animate Final Project

Time-Based Media Project
